

HYDRO MAC

ไฮโดรแมค

zinc, copper
iron, manganese
selenium.

Plankton and Algae

HydroMAC
50 ml/ ton of water
in plankton tank

Broodstock

HydroMAC
20 ml/ton of water or
topcoat feed with
HydroMAC
10-20 ml/kg of feed

Shrimp and fish larvae

HydroMAC
10 ml/ton of
water in larvae tank

Transportation

HydroMAC
10-20 ml/ ton of water
in packing water

Growth out pond

Topcoat feed with
HydroMAC
5-10 ml/kg of feed

HydroMAC Trace minerals and feed supplement in liquid form. Chelated minerals with amino acid (Metal Amino Acid Complex: MAAC). High quality and high Bioavailability sources of trace minerals such as zinc, copper, iron, manganese, selenium with amino acid.

Good Bioavailability and absorption, Good dispersion in water. Improved mineral status and higher performance of animals. Immune, blood, skeletal (bone/fin) and reproductive system. Growth development and increase pigmented.

Plankton culture. Accumulation of protein and lipid in cell, Structure development and increase number of cells in plankton culture.
