

SPIRULINA

Premium Spirulina is most balanced and most digestible protein plant suitable for all stages of shrimp and fish species. It is rich in proteins, vitamins (esp. B12), essential fatty acids (gamma-linolenic acid) and trace minerals. Moreover, premium spirulina contains carotenoids which act as an antioxidant, immune stimulant and also color enhancing substances. Spirulina can increase palatability and digestibility of feed therefore minimize excreted waste.

Features & Benefits

Nutrition value

Protein	65.0%	min
Fat	7.0%	max
Ash	7.0%	max
Total carotenoids	420mg/100g	min

➤ High growth rate and survival rate

Spirulina is rich in various essential nutrients which can hence support a better growth performance and survival of larvae.

➤ Enhance vibrant coloration

Spirulina contains a high concentration of natural pigments which are important to the coloration of shrimp and fish.

➤ Natural immune enhancers to promote tissue maintenance & development

Spirulina contains carotenoids which are strong antioxidant that boost immune system.

➤ Appetite-raising, illness-resisting and quality-improving

The attractive smell can increase the feed intake and hence can secure larvae to get enough nutrients and energy it needs for proper body system functions.

Feeding Guide

2-3 g/100,000 pcs of larvae/m³,
2-3 times a day

Packaging

- **MARINE SPIRULINA:** 1 kg/bottle
- **PREMIUM SPIRULINA:** 500 g/bottle
